AI in Financial Sector — Research Papers 1–20

Combined list of the original 10 papers and the 10 new papers. Numbering is kept strictly in order from 1 to 20, with clickable paper links.

No.	Research paper	Year	Main topic	Why it is useful	Clickable paper link
1	Large Language Models in Finance: A Survey — Li et al.	2023	AI/LLMs in finance	Broad foundation covering financial NLP, LLM adoption, fine-tuning, use cases and limitations.	https://arxiv.org/abs/2311.10723
2	BloombergGPT: A Large Language Model for Finance — Wu et al.	2023	Financial AI / FinLLM	Important paper on a finance-specific 50B-parameter LLM trained on a large financial dataset.	https://arxiv.org/abs/2303.17564
3	FinGPT: Open-Source Financial Large Language Models — Yang, Liu & Wang	2023	AI financial assistant / FinLLM	Particularly relevant for financial assistants, robo-advising, algorithmic trading and financial decision support.	https://arxiv.org/abs/2306.06031
4	Can ChatGPT assist in picking stocks?	2024	AI financial assistant / stock selection	Directly studies whether ChatGPT can evaluate financial information and generate useful investment recommendations.	https://www.sciencedirect.com/science/article/pii/S1544612323011583
5	Can ChatGPT improve investment decisions? From a portfolio management perspective	2024	AI as financial assistant	Examines ChatGPT as an assistant/co-pilot for portfolio managers and its ability to improve diversification.	https://www.sciencedirect.com/science/article/pii/S154461232400463X
6	Can ChatGPT Forecast Stock Price Movements? Return Predictability and Large Language Models — Lopez-Lira & Tang	2023	AI and stock market	Investigates whether GPT-4 can extract information from news headlines and predict subsequent stock returns.	https://arxiv.org/abs/2304.07619
7	Can Large Language Models beat Wall Street? Evaluating GPT-4's impact on financial decision-making with MarketSenseAI	2024/2025	LLM + stock selection	Uses GPT-4 to combine market trends, news, fundamentals and macroeconomic information for investment signals.	https://doi.org/10.1007/S00521-024-10613-4
8	An Advisor Neural Network framework using LSTM-based Informative Stock Analysis	2025	AI stock-market prediction	Combines LSTM-based forecasting with financial and contextual information to create a stock-selection strategy.	https://www.sciencedirect.com/science/article/pii/S0957417424021663
9	Utilisation and Implications of Cloud Computing in the Banking Sector	2023	Cloud providers + banking	Particularly relevant to your cloud-provider topic; discusses SaaS, PaaS, IaaS and compares AWS, Azure and GCP for banking applications.	https://ieeexplore.ieee.org/document/10563290/
10	Scalability and Security Challenges of Cloud Computing in the Banking Industry	2024	Cloud + financial sector	Studies cloud adoption in banking with emphasis on scalability, security and regulatory compliance.	https://ieeexplore.ieee.org/document/10903765/

AI in Financial Sector — Research Papers 11–20

Continuation of the same combined list. Papers 11–20 are the new papers, preserving their order from the previous list.

No.	Research paper	Year	Main topic	Why it is useful	Clickable paper link
11	Artificial intelligence in financial services: a qualitative research to discover robo-advisory services	2021	AI financial services / robo-advisory	Useful for understanding investor perceptions and human factors behind AI financial assistants.	https://doi.org/10.1108/QRFM-10-2020-0199
12	Financial applications of machine learning: A literature review	2023	AI/ML in finance	Broad foundation for ML/DL applications across stock markets, portfolios, crypto, forex and financial risk.	https://doi.org/10.1016/j.eswa.2023.119640
13	Artificial intelligence techniques in financial trading: A systematic literature review	2024	AI financial trading	Maps AI techniques, markets, datasets and evaluation practices used in automated financial trading.	https://doi.org/10.1016/j.jksuci.2024.102015
14	Implementing artificial intelligence empowered financial advisory services: A literature review and critical research agenda	2024	AI financial advisory / robo-advisory	Provides a framework for implementing AI-powered financial advisory services as customer-facing systems.	https://doi.org/10.1016/j.jbusres.2023.114494
15	Charting by machines	2024	AI and stock-market prediction	Shows how machine learning can extract predictive information from historical stock-price performance.	https://doi.org/10.1016/j.jfineco.2024.103791
16	Two-stage stock portfolio optimization based on AI-powered price prediction and mean-CVaR models	2024	AI stock prediction + portfolio optimization	Connects AI price prediction directly with risk-aware portfolio allocation.	https://doi.org/10.1016/j.eswa.2024.124555
17	The diversification and welfare effects of robo-advising	2024	Robo-advisory + portfolio welfare	Provides real-world evidence on how robo-advice changes diversification, fees, performance and investor time.	https://doi.org/10.1016/j.jfineco.2024.103869
18	Robo-advisors: A systematic literature review	2024	Robo-advisor research	Consolidates robo-advisor research and identifies major research streams and future questions.	https://doi.org/10.1016/j.frl.2024.105119
19	Portfolio management with the help of AI: What drives retail Indian investors to robo-advisors?	2025	AI financial assistant / robo-advisory adoption	Provides Indian evidence on what drives retail investors to adopt AI-based robo-advisors.	https://doi.org/10.1002/isd2.12346
20	Advancements in Artificial Intelligence and Machine Learning for Stock Market Prediction: A Comprehensive Analysis of Techniques and Case Studies	2024	AI stock-market prediction	Summarizes AI/ML methods, datasets and evaluation approaches for stock-market forecasting.	https://doi.org/10.1016/j.procs.2023.12.193
